

Pet Soap

Our furry friends deserve
the best soaps too

There is little to no legislation to protect pets from the ingredients in their cosmetics. Often manufacturers market detergents as pet shampoo.

They neglect the quality of ingredients and their health effects on our animals in the long run.

Our animals have sensitive skin as we do and are prone to dryness, rashes, and itching from the chemical in cosmetics just as we are from a poor quality soaps and harsh shampoos.

Our Pet Soap is made using the same olive oil base as in our human lines and diatomaceous earth, which is a finely crushed sedimentary rock known to repel common pests. That's it!
